✓ SCIENCE OF LIFE - Reel 8.

How the Mosquito Spreads Disease. ✓

This reel picturizes the life history of the mosquito in detail, by photo-micrographs and drawings. The harmless culex, and the female anopheles which alone feeds on blood and becomes a disease carrier. The malaria parasite; its life history in the mosquito and in blood. Prevention of malaria and of yellow fever. A striking presentation of fascinating scientific information.

This document is from the Library of Congress  
“Motion Picture Copyright Descriptions Collection,  
1912-1977”

Collections Summary:

The Motion Picture Copyright Descriptions Collection, Class L and Class M, consists of forms, abstracts, plot summaries, dialogue and continuity scripts, press kits, publicity and other material, submitted for the purpose of enabling descriptive cataloging for motion picture photoplays registered with the United States Copyright Office under Class L and Class M from 1912-1977.
